

Press release 31 March 2023 at 16.50

The oral health operations of Pihlajalinna will be transferred to Hammas Hohde from 1 April onwards.

The sale of Pihlajalinna's oral health operations to Hammas Hohde Oy was confirmed today, on 31 March 2023. All of the 16 clinics, two dental laboratories and approximately 200 oral health professionals included in the deal will be transferred to Hohde from the beginning of April 2023. As a result of this deal, the dental clinics will become part of Hammas Hohde Oy, while the dental laboratories will become part of Loisto Laboratoriot Oy.

"The transfer of Pihlajalinna's dental clinics to the Hohde group is a significant step for us. In the future, we will have more than 500 professionals operating in 21 municipalities and 33 locations. Thanks to this deal, our network of dental laboratories will also grow in line with our strategy. This will improve our ability to provide our clients with comprehensive, high-quality dental care across Finland," says CEO of Hammas Hohde **Ville Pesonen**.

"We will simplify our business structure in private healthcare services and focus on selected services, such as comprehensive surgery services. We will continue to offer oral health services for our clients through a close partnership with Hohde. This is also evident in the fact that the clinics transferred to Hohde that are currently operating in the premises of our medical clinics will continue operating at these locations. Additionally, Hohde's expertise and investments in oral health services will further improve the national availability of services to clients of occupational health services, for example," says Acting CEO of Pihlajalinna **Mikko Wirén**.

The parties have agreed not to disclose the sale price.
